ANDROID: VANVITELLI or EDUROAM WIFI CONNECTION SETUP

First of all, go to Settings \rightarrow wifi, and choose Additional settings \rightarrow Manage saved networks

Find eduroam, tap on it and delete it

(Forget Network)

It is necessary to eliminate all the previous settings stored on device.

Open a browser, and download the file <u>www.wifi.unicampania.it/images/cacert.crt</u>

Then, in Additional settings, choose Install certificates, tap on lens icon and start writing cacert... will appear the file downloaded before. Tap on it.

name the certificate as radius.wifi.unicampania.it, then OK

Additional settings	
Name this certificate Certificate name radius.wifi.unicampania.it	٦
CANCEL (ок

All the operations described above are intended to be done once.

Now, let's go to set the wifi's connection. In Available Network, choose eduroam, then Advanced option
