

A guide to setting up the eduroam Enterprise Wi-Fi network on your Chromebook

Setting up eduroam on Chromebook is quick and easy, thanks to the Vanvitelli/Eduroam configuration profiles available on the cat.eduroam.org platform.

Go to the last page for instructions on changing your Wi-Fi password.

With Chromebook, launch Chrome and go to the link <https://cat.eduroam.org/?idp=8096> and download the installer for Chrome OS

**Scarica il tuo programma di installazione per Chrome OS**

eduroam

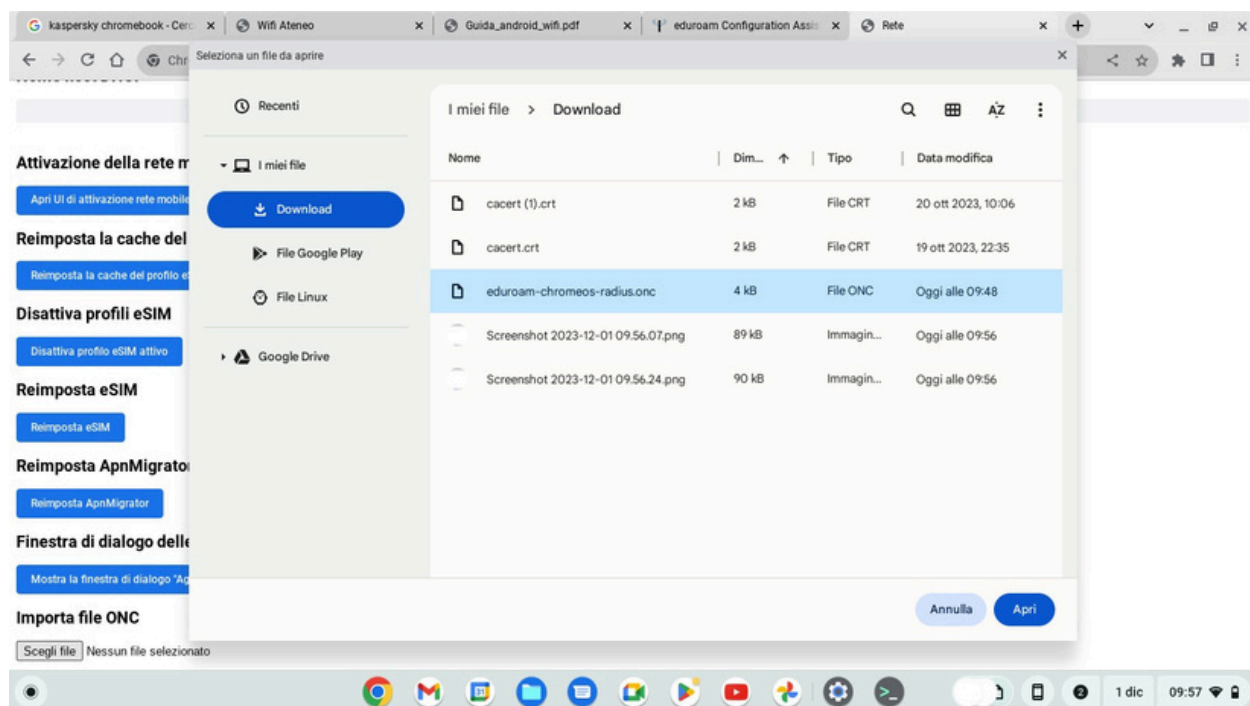

i

[Scegli un altro programma di installazione da scaricare](#)

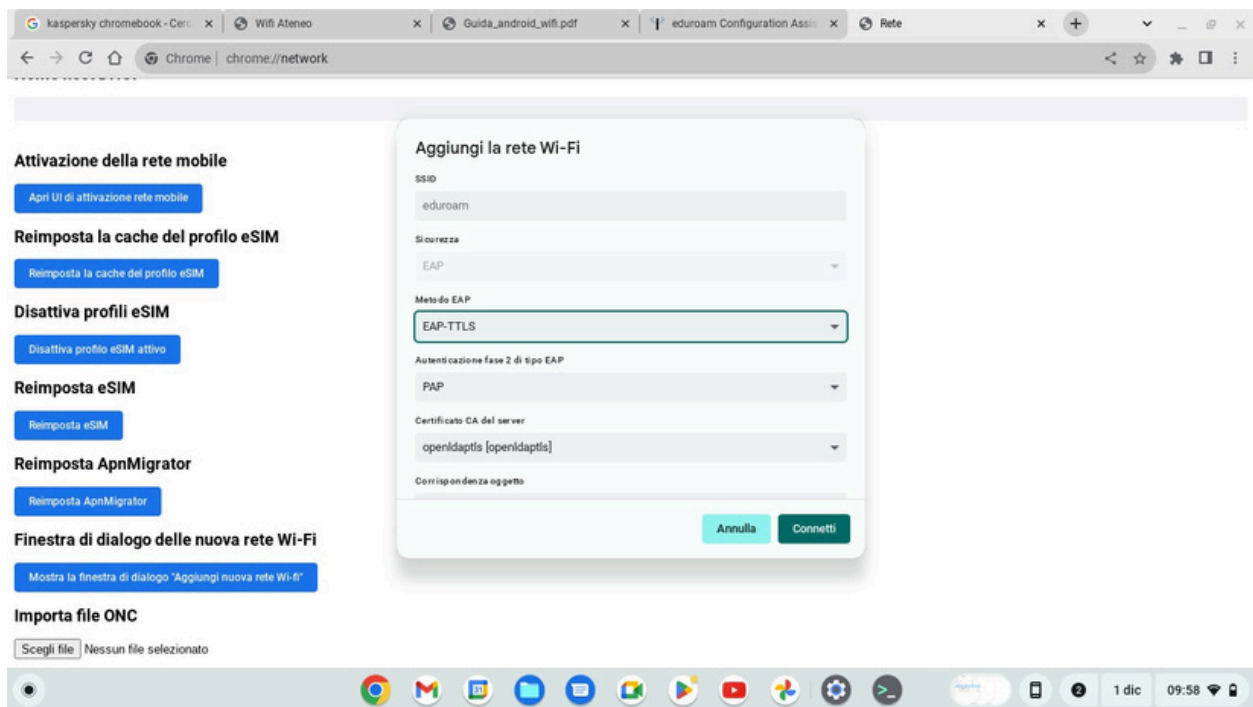

Lanciare **Chrome** e digitare nella barra degli indirizzi `chrome://network`

Under Import ONC File, press the **Choose File** button, select **Download** in the window that appears, select the file you just downloaded **eduroam-chromeos-radius.onc**, and press **Open**.

At the bottom right of the timetable, click on the Wi-Fi icon and choose the **eduroam network**...

...scroll down to the identity and password fields, and fill them in with your Wi-Fi credentials.

Enter as user (Identity):

nome.cognome@unicampania.it for teachers, AT

nome.cognome@studenti.unicampania.it for student

Enter the password you set on www.wifi.unicampania.it

(see next tab for instructions on changing your password)

and press Connect.

Setting WIFI password

From a networked device, go to **www.wifi.unicampania.it** and log in using centralized authentication to reach the password management page.

If the account already exists, the button will be orange with the text "**Modifica password WIFI.**"

Otherwise, the account will be generated.

Pressing the button will display the password change screen, and the OTP code will be sent to the user's inbox.

Please wait a few minutes for the code to be received.

If it is undelivered, do not try again immediately; wait about 10 minutes between each attempt.
