

## LINUX: VANVITELLI or EDUROAM WIFI CONNECTION SETUP

Launch Firefox, type in the address bar

<https://www.wifi.unicampania.it/images/cacert.crt>

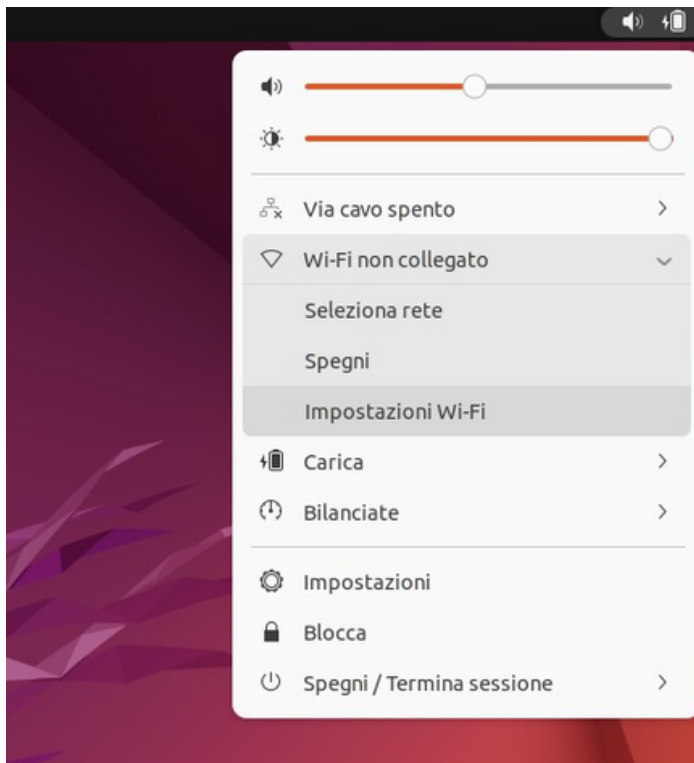

(From a computer connected to the network with a LAN cable connected to another wireless network or by creating a hotspot with your mobile phone)

The certificate needed for the connection will be downloaded

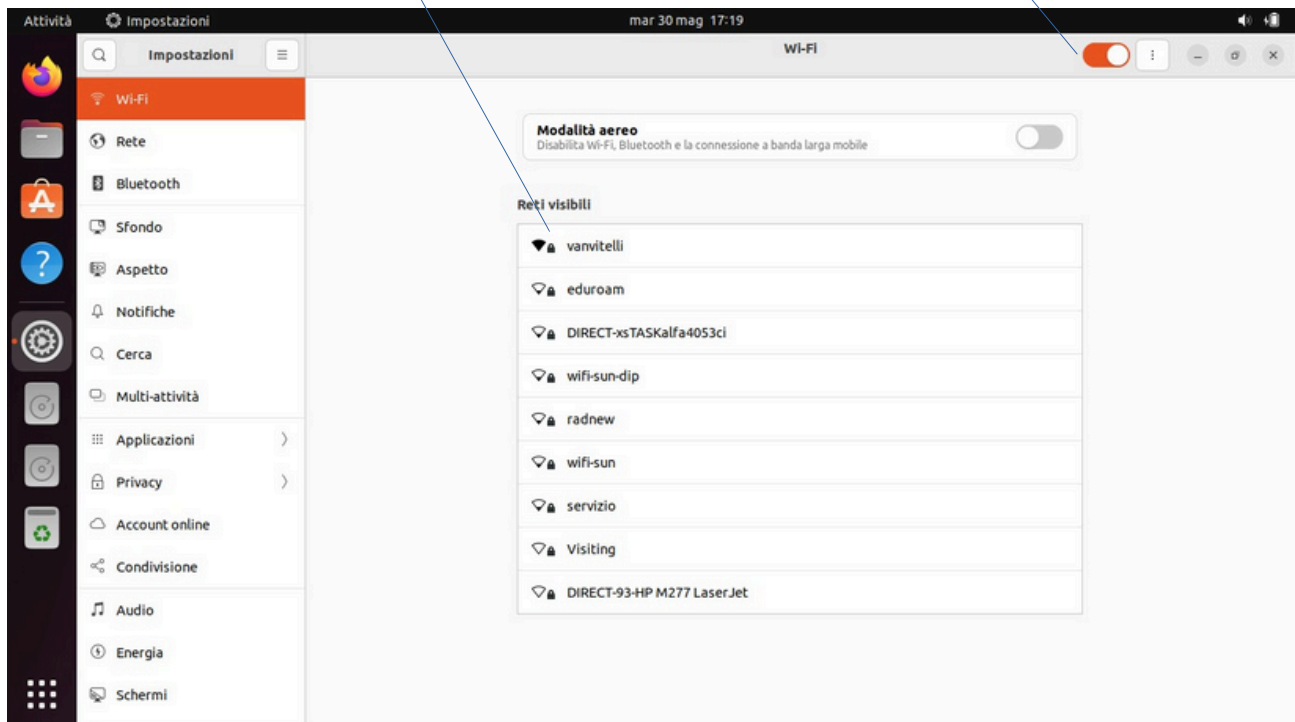

locate the folder where the file was downloaded, it will be used for the subsequent setting in the connection profile

from the status bar, go to  
Wi-Fi settings

Make sure Wi-Fi is turned on and select the wireless network  
you want to connect to.

In the window that appears, set the following values as shown in the figure:

Authentication:  
**TLS tunnel**

CA Certificate:  
**cacert.crt**  
(Select the Select from File... option and browse through the resources until you locate the previously downloaded file.)

Internal authentication:  
**PAP**

Enter your username and password.

(You can set these credentials yourself at [www.wifi.unicampania.it](http://www.wifi.unicampania.it) after identifying yourself with the centralized authentication system.)
